1- Knowing the reference number, see at the end of the catalogue the numerical index, ordered from the smallest to the biggest. Once you have the reference, next to it, you will see a number that corresponds to the page where is situated the reference.

2- Knowing where this reference is mounted, or the groups to which it belongs, see the figures index and situate the corresponding figure number.

3- An assembly part can be searched in page nº 122 "Assembly Parts" or in the corresponding group.

4- When you look for a reference, take into account the following points :

a)- Vehicle version : convertible or metallic roof, standard or de luxe, injection or carburation, left hand or right hand driving.

b)- Chassis, engine or gearbox number.

c)- If it is a national or a Japanese part.
